Skill governance process - derive skill metrics for analysis

Initially individual evaluations are completed

The experts look at all of the responses from the team collectively and develop key observations and metrics.

Identify

- Team skill gaps,
- Individual Strength/Weak areas,
- Team Strength/Weak areas,
- Team orientation,
- Individual and team ratings with regard to architecture Attributes,
- Individual and team's readiness to be deployed for critical Architecture initiatives.

Customization to suit your needs

Business Model Specific

- Services, Product, End User Companies

Domain customization

- Teleco, Manufacturing, BFSI, Healthcare, Real Time (Embedded)

Content customization

- Case studies & exercises

Effort distributions

- Locations, Team size, # of days, duration, schedule

Skill Certification

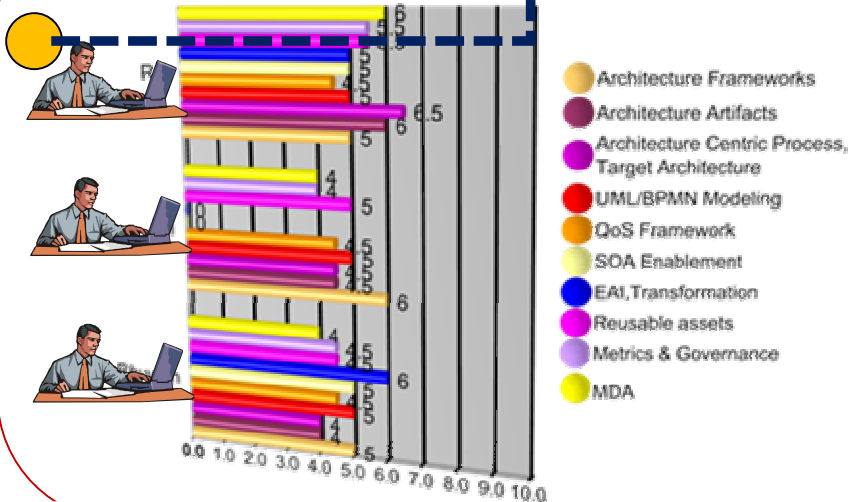

- Architecture skills

Skill Governance

- Ability to apply these skills in domains (Telco, Finance) etc..

Only one person in the team had knowledge to practice architecture work

Summary of Skill Maturity Team (Architect's) readiness
